## Miracles of Medicine

### *Relieve the Torture of Fatigue and Pain Within Weeks*

You saw last month how fixing hidden breathing abnormalities can quickly fix chronic fatigue and fibromyalgia. Jeanette is a perfect example of how this is possible.

After suffering through a very difficult and stressful time in 1992, she began to suffer from fibromyalgia and chronic fatigue. "My neck constantly ached," she told me.

Jeanette had suffered from recurrent ear infections since childhood. After two bouts of severe mastoiditis (infection in the bone behind the ears), an open-minded ENT physician referred her to Doctor Robson.

I told you about Doctor Robson last month. He discovered that breathing abnormalities can cause a wide array of health problems because of our body's response to a blockage in the throat. To fix the blockage, Doctor Robson inserts a custom-made splint that opens the airway and relaxes the body. It's a truly revolutionary treatment!

With the fitting of her appliance, she realized she had been choking all along. With tears welling up in her eyes, she related how the horrible intractable ear and neck pain cleared instantly.

Doctor Robson explains that all her dysfunction was her body's life-saving response to keep her airway open. Her fibromyalgia and chronic fatigue began to fade away quickly and was gone in a matter of weeks.

I strongly suggest that anyone with any chronic health problem pay a visit to Doctor Robson or a dentist trained by him. For more information or to find the nearest licensed OSB dentist, contact Doctor Robson's office at 800-977-1945.

**Doctor Farrand Robson and Oral Systemic Balance (OSB) would like to thank Doctor Rowen for allowing us to reprint the preceding articles for distribution.**

For additional information regarding the therapeutic system described in these articles, please contact the OSB office at (800) 977-1945.
